Alston Education

Content • Digital • Consultancy

Introduction

Alston Education is a leading education content provider established in Singapore. We have a wide variety of ELT products spanning from course books, skills, grammar, readers and ESP. We also specialised in creating bespoke Science and Mathematics educational materials for different curriculum frameworks.

Our Network

Alston Education has been striving to develop its sales network in different territories since establishment. We have a strong foothold in more than thirty territories worldwide. Our partners are in territories located in Southeast Asia, North Asia, South Asia, Latin America, the Caribbean and the Middle East.

Our Services

Alston Education focuses on delivering quality content, digital and consultancy services. Our signature publications are based on the Cambridge Assessment International Education curriculum framework, and it has been well-received worldwide. Our digital platform – Alston Digital is used by more than 200 schools. Our consultancy services assist in the development of curriculum and textbooks, and building the capacity of educators. We have a strong long-term partnership with the Ministry of Education of the the Republic of Azerbajian.

Digital Support

Digital Learning Platform

www.AlstonDigital.sg

- A learning platform with various features to support an integrated learning environment.
- Teachers can assign and grade assignments online, and gain access to exclusive question banks.
- Learners can complete assignments and turn them in online.
- Access eBooks and other learning materials anywhere, anytime!

Key Features

Resources

Access eTextbook, eWorkbook and eTeacher's Guides to prepare and deliver lessons easily in the classroom.

Assignments

Assign different types of assignments and grade them by providing additional feedback to individual learners.

Test Paper

Generate different types of test papers using Alston Digital's specialised questions banks.

Interact

Create groups to facilitate discussions or communicate with individual using text-chat.

Announcements

Broadcast messages and collate information from learners efficiently.

Digital Support

Online Access

Caves Online Practice (COP)

- A platform with plenty of practice that you can assign to learners.
- Easy to navigate and simple to use.
- Multiple question types, such as vocab matching, listening and reading comprehension, dialogue recording, etc. ensure that learners have sufficient exercises.

Caves WebSource (CWS)

To meet 21st century users' needs to learn online, we built a free online platform, Caves WebSource, for users to access the learning materials once they scan the QR code in the books. Audio, videos, resources, and even games and extra links are all available here!

Each series has its own platform.

All the audio and videos are available on Caves WebSource.

The layout is so user-friendly that users can find the resources they need quickly.

Digital Support

Mobile Applications

R21 Learning Application

Especially designed for R21-Reading for 21st Century Kids, R21 Learning App aims to help learners become active 21st century learners even after classes by providing them with different types of motivating exercises.

P21 Learning Application

With this exclusive learning App, learners are able to listen to audio, watch animated songs, and play fun games to help review what they have learnt.

**Both applications are available for both iOS and Android systems.

Read classic literature as you are learning the skills of the English language!

Best Friends is a six-level ELT series which provides learners a comprehensive reading experience. Through the use of interesting classic literature, learners are provided with before reading, during reading and after readings questions to provide support to help them read fluently. The practices provide step-by-step guidance as they practise the key language skills.

- Uses an innovative mix of activities - stories, factual content, cartoons, role-playing, classic literature, projects etc. to engage the learners as they acquire a new language.
- CLIL content in each unit to introduce learners to wider subjects and cultural contexts when they learn how to use the language.
- Picture Dictionary (Level 1 2) and Illustrated Glossary (Level 3 - 6) for the key vocabulary words are provided to support learners in vocabulary building.
- Using the digital elements provided, teachers are able to provide enhancing and meaningful lessons for the learners.

Best Friends Book 3

Each chapter starts with a short cartoon for learners to practise listening, reading and speaking.

CLIL provides the opportunities for learners to apply what they have learnt in a realworld situation.

Adapted classic literature with scaffolding questions to help learners understand the text.

Varied guided practices to hone the four key skills – listening, speaking, reading and writing.

Writing Skills

CEFR: A1-A2

Develop good writing skills through a systematic approach!

Writing skills is a three-level science series for learners to develop good writing skills systemically. The series aims to gradually build up writing skills using structured and targeted practices. The writing process is simplified using guiding exercises that focus on different target traits of effective writing.

Contents in each level:

Part I: Learning to Write

- Ideas
- Word choice
- Sentence fluency
- Organisation
- Voice

Part II: Writing on your own

- Expository
- Personal narrative
- Persuasive writing
- Literature

- ► Each book is divided into two sections "Learning to Write" and "Writing on your own".
- "Learning to Write" focuses on the traits of writing to guide learners to become more confident writers. Detailed explanations and examples are used in each unit to scaffold the steps for each trait.
- "Writing on your own" focuses on different text types to expose learners to features of different genres. Guided writing steps are provided to aid learners in developing their writing frame.

Scaffolded activities to develop learners' understanding towards the writing traits.

Progressive activities to simplify the writing process within the same unit help to build the writing capacity of learners.

"Write on Your Own" shows learners the different types of text and provides guidance towards writing the genre effectively.

Simply Talk & Write 2nd Edition

Author: Jane M. Chai CEFR: A1-A2

Simply series makes English learning so simple!

Simply Talk & Write is a six-level series for all ages of English learners. The series guides learners to use dialogues to structure their writing. With practical guidance in the books, learners will find it easy to write short passages. This series is perfect for use as writing practice books, review material, or self-study material.

- ► Each unit is designed to be finished within 20 minutes, which makes the series perfect supplementary material in class.
- The combination of conversation and writing makes writing classes easier and joyful for beginners.
- Each unit focuses on practicing one sentence pattern. Learners will have oral practice first, and when they are about to write, they are already familiar with the target sentence pattern

Simply Talk & Write Book 3

Each unit starts with a daily conversation, which brings out the topic that learners will write later.

The content of the model text is structured from the previous conversation, giving learners a template to think about their writing.

Learners will use the sentence patterns and vocabulary to do the oral activity in the classroom.

Simply Talk & Write Book 5

At the end of each book, there are writing sheets for each unit.

Grammar Practice

CEFR: A2

Build a strong foundation for grammar accuracy!

Grammar Practice is a four-level series for learners to build a strong foundation in their grammar abilities. Each unit is scaffolded to provide clear explanations of one grammar point with relevant examples before the practice questions. This helps to build a strong foundation for each grammatical structure.

- Each unit is designed to address an aspect of grammar which provide systematic learning for the learners.
- The grammar rules are arranged progressively as learners move from the different CEFR levels.
- Variety of activities, including speaking and readings to allow learners to apply what they have learnt.
- ► Each level has two review tests for learners to consolidate the grammar points learnt.

Each unit consists of these features:

- Grammar notes
- Examples of sentences for grammar points
- Practice and review questions, including speaking and reading
- Practices for sentence construction
- Checklist for grammar and vocabulary

Grammar Practice 1

Clear explanation of grammar points written in notes format at the start of each unit.

Reading passages for learners to examine grammar structures.

Practice questions set in context to help learners understand how to use the grammar points.

Apply newly learnt grammar through a conversational practice.

Grammar Practice 4

Well-organised and concise study notes communicate grammar points to learners effectively.

Immediate practices to reinforce the grammar points learnt.

Numerous short practices in each unit help to reinforce the grammar rule.

G21-Grammar for 21st Century Kids

Author: Y. H. Mew CEFR: A1-A2

G21 makes grammar learning so much fun!

G21 is a six-level series that helps elementary learners understand essential grammar concepts, mastering both spoken and written English. The structured approach, clear explanations, and ample practice make it ideal for classroom use. With its lively presentation and varied activities, this series will attract young learners, helping them become competent English users.

- Comic-like dialogue and lively visuals make grammar use a lot easier and more interesting.
- Concise and simple explanations for grammar help learners understand grammar points with ease.
- Useful examples, simple questions, and practical exercises build up learners' confidence and help them check their understanding of the grammar rules.
- Starter unit and 4 review units in each book provide thorough review to reinforce learners' learning.
- Each level has 4 projects of fun group activities that will engage all learners and allow them not only to practise grammar, but to cultivate their communication, collaboration, creativity and critical thinking skills.

G21- Book 1

Simple dialogue, clear and easy explanation and interesting practice make grammar learning so much fun.

G21- Book 2

Each project offers exciting group activities for learners to utilize what they've learnt and develop their communication, collaboration, creativity and critical thinking skills.

G21- Book 6

Learners will apply the grammar points through various listening, speaking, reading, and even challenging writing exercises that require them to construct longer sentences or paragraphs.

A jam-packed lab full of language, learning, and laughter!

The Reading Lab series provides opportunities for readers to discover incredible STEAM knowledge from their daily lives through attractive original stories. Each book not only trains readers' reading skills page by page but also encourages readers to practise language skills through diverse and engaging post-reading activities. This series is perfect for beginners who hope to get into the STEAM world without pressure.

- The series covers a wide range of topics from learners' everyday life to environmental issues, allowing learners to read with fun and insights!
- Each book provides three STEAM facts related to the story. Learners are able to enjoy the story and discover useful knowledge in interesting and thought-provoking real-world contexts.

The Reading Lab Level 4: Hot Air Balloon

Learners will have different tasks to do while reading through the story, such as "Act," "Speak," and "Think."

The Reading Lab Level 1: Welcome to My House

Simple STEAM Facts in each book introduces short but informative knowledge for learners to explore the world around them.

At the end of a book, learners have a mission to complete! They will learn to create, cooperate, and even do some simple experiments!

Flow-21st Century Strategic Reading

Authors: James Baron / Joe Henley CEFR: A2-C1

Flow into various types of readings with 21st century insights.

Flow is a three-level reading series. Different types of appropriate and engrossing reading topics are collected in the series, including sports, pop culture, travel, nature, technology, and many more. It effectively helps learners sharpen their reading skills and the 4C skills through well-designed activities.

- Each unit includes two lessons, each containing a specific reading skill and vocabulary builder that help readers better understand a text and expand their vocabulary.
- The tasks and activities before and after each article are carefully designed to help learners improve their reading comprehension in general.
- The comprehensive 21st century activity at the end of each unit allows learners to apply what they have learnt and the 4C skills altogether.
- "People in America" videos are selected from VOA (Voice of America) as extra learning material for learners to get inspired.

The Reading Skill part teaches skimming, scanning, etc. Task 1 helps readers practise the newly learnt skill, and Task 2 allows readers to apply the skill to the upcoming reading.

Different types of readings lead readers to a wide range of modern topics and useful key words.

Strange Celebrations
Around the World of the strain of the substantial of the strain of the substantial of the substantialy

The post-reading exercise incorporates what learners learn in the previous readings and the four 21st century learning skills: communication, collaboration, creativity, and critical thinking.

There are three kinds of highlighted vocabulary, helping readers expand their

vocabulary.

Alive-21st Century Strategic Communication

Author: Daniel Hailstone

CEFR: A2-B2

Make your conversations come alive!

Alive is a three-level series that aims to advance learners' conversational skills in the 21st century context. It covers a wide range of topics and a variety of activities, which enable learners to elaborate dialogue contents, develop 21st century skills, and cultivate their presentation abilities. Different cultures are also introduced to help learners communicate with foreigners effectively.

- There are two conversations in each unit, so learners can learn to express themselves from different aspects under the same topic.
- Tips for further sharpening speaking skills are also provided to allow learners to practise by themselves, such as repeating the lines and talking to themselves.
- "English in a Minute" videos from Voice of America are provided after every three units as additional material to learn colloquial terms.

Alive Book 1

Learners are able to learn to elaborate contents with useful patterns regarding the topic.

After each unit comes a speaking project with 4C skills: communication, collaboration, critical thinking, and creativity, making learners become 21st century learners.

Each book features four famous speakers, such as Oprah Winfrey in Book 1. Teachers can play their presentation videos to motivate and inspire learners.

After the introduction of the speaker, there is an activity to train learners' presentation skills by learning the advantages of the featured speaker.

Vibe-21st Century Strategic Listening

Authors: Stefan Kostarelis / Stephen Lambert / Jessica Beck CEFR: A2-B2

Experience the great vibes from the series!

Vibe is a three-level series that is designed to advance learners' listening abilities. It includes various listening practices and practical classroom activities to ensure that learners effectively build skills in listening and conversation. This series is designed for high school and college learners, and it can be used independently or alongside other skills courses.

My job: It's a blend of farming, of science and arts

- To fully engage and motivate learners in the class, every book covers a wide range of topics and situations, from daily conversations to short speeches.
- To make learners understand natural English, there is a section providing colloquial terms to help them better understand daily conversations.
- "People in America" videos are selected from VOA (Voice of America) as extra learning material for learners to get inspired.

Vibe Book 1

A warm-up activity introduces learners into a unit's topic, and it can be used as icebreakers in their daily conversation.

There are three different kinds of listening tasks to complete in each unit, which aim to train learners' listening skills from different approaches.

After each unit, there is an additional classroom activity. It focuses on oral practice and is aimed at encouraging learners to apply the learnt listening skills to speaking.

English Works for the Office

Authors: Stefan Kostarelis / Jessica Beck / Susan Crosthwaite

CEFR: A2-B2

Let's make English work everywhere!

Enalish Works for the Office is a three-level series that is designed to prepare users for using English in the workplace. It is aimed to train users' abilities in the four language skills as well as business practice. This practical material focuses on the actual use and need of language in the workplace, and it is suitable for learners preparing to enter or those who have already entered the workforce.

English Works for the Office Book 2 video 69 **0** 0 As you know, our newest game has been one of the top ten selling games in the country.

- The series covers all workplace scenarios, starting from the first job interviews to all possible situations at work.
- The series trains learners to be fully equipped in business communications by doing exercises in listening, speaking, reading, and writina.
- There is a video in actual office environment for each unit. Learners can learn workplace English and learn how to use the language in a context.

English Works for the Office Book 1

Some interesting and informative cases are selected as case studies in the reading.

Each unit better prepares learners for future business dealings by addressing cultural differences and providing colloquial usage of common English phrases and idioms.

English Works for the Office Book 2

Each topic in this series not only sharpens learners' language ability but also provides useful workplace guidelines to make them well-prepared for the coming work life.

English Works for Journalism

Author: Andre Louw CEFR: B1-B2

Understand news English through listening, speaking, reading, and writing!

English Works for Journalism provides users with a comprehensive guide to acquiring and honing key journalistic skills. Making use of interesting and factual news reports presented in several different formats, this practical, helpful, and innovative work not only exposes learners to commonly-used media terms and techniques, but also helps them to explore all the various aspects of news reporting in great detail.

- The book aims to empower users with the skills and confidence necessary to succeed in the demanding, fast-paced world of journalism.
- The book is carefully designed to cover every aspect of news reporting in an engaging and enlightening way to nurture competent journalists of the future.
- ► Each unit includes two news videos: topical real-life reporting clips from VOA and original and easy-to-understand journalistic videos simulating reporting scenarios.

An eye-catching opening page invites active classroom discussion about the topic.

Each unit has an actual news article sourced from highly-acclaimed news agencies, including *The New York Times*, VOA, and *Reuters*.

After each unit, there is an additional classroom activity. It focuses on oral practice and is aimed at encouraging learners to apply the learnt listening skills to speaking.

Happy Science

Author: Lia Leow Level: Kindergarten

Using inquiry-based learning pedagogy to develop Science literacy!

Happy Science is a two-level science series for young children to get a head start in the subject. Through the use of thought- provoking questions and relevant life scenarios, the series aim to arouse the children's curiosity about science. The children will be introduced to the fascinating world of Science through various investigative and hands-on activities.

Engage – Explore – Reflect (Chalufour et al. 2004) to design the learning experience for the children.

Uses the instructional framework,

Provides carefully structured content knowledge development and instructional strategies to develop the five areas of early childhood development – Cognitive, Communication, Social, Adaptive, Fine Motor Skills.

Content in each level

KG 1:

- Living things
- Characteristics of objects and materials
- Space and environment

KG2:

- Living things
- Materials
- Energy and forces
- Space and environment

Each chapter starts with a chapter opener for children to learn through conversations. They can develop communication and social skills through interaction and collaboration.

Activities to help children hone fine motor skills and master hand-eye coordination.

Age-appropriate life skills and behavioural lessons to guide children in the development of their adaptive skills. The curriculum provides holistic growth and prepares children to be self-sufficient individuals.

978-981-3180-43-7

Components

Happy Maths

Author: Desiree Lee Level: Kindergarten

Introducing children to the fun and exciting world of Mathematics!

Happy Maths is a two-level science series for young children to see the world around them using the Mathematical lens. The realistic and relevant context sparks the children's curiosity as they are introduced to Mathematical concepts.

- Uses the theme based approach to introduce Mathematical concepts to young children.
- Develops numeracy concepts and language of mathematics through children's daily experiences.
- Comprises of varied activities to develop the five areas of early childhood development – Cognitive, Communication, Social, Adaptive, Fine Motor Skills.

Content in KG 1 and KG2:

- Counting
- Sequences and position
- Addition
- Subtraction
- Shapes and colours

Each chapter starts with a chapter opener which has a short activity to draw the children into the concept.

Introduces mathematical concepts and key vocabulary through interesting context.

Practices to revise mathematical concepts learnt.

Drawing practices for children to express their learning visually.

Activities which involves engagement with peers to build communicative and collaborative skills.

Tracing and colouring practices for development of hand strength, hand-eye coordination. Also helps in colours recognition.

Active Science

Author: Wang In Ching (Stage 1-2), Dr Loo Yoke Leng and Dr Ivan Yow (Stage 3-6) Level: Primary

Combination of Singapore's teaching approach to Science with the International Cambridge Primary Science (0097) Curriculum!

Active Science is a six-level science series for learners to actively build their understanding through exploration, discussion and problem-solving. The unique combination integrates the Singapore approach of inquirybased experimental learning with Active Learning strategies to maximise learner engagement. The learners are exposed to varied learning activities presented in the teaching materials to hone their scientific knowledge and skills. The learners will be challenged to think critically and creatively to become effective problem-solvers.

- Uses Problem-based Learning to anchor each chapter with a case problem.
- Each chapter is a learning journey where learners will engage with a problem at the start, learn through activities, and solve the problem using the knowledge learnt at the end.
- Varied levels of questions to assess the understanding of learners - knowledge recall questions, comprehension questions and application questions.
- Comprehensive teacher's guide to help teachers to deliver quality inquiry lessons in the classroom.

Active Science Textbook Stage 4

Investigative activities to explore scientific concepts and build scientific investigation skills. Each chapter starts with a problem scenario where learners need to gather clues to learn about the problem.

Annotated diagrams to explain scientific concepts.

Immediate reinforcement questions to check for understanding.

Active Science Workbook Stage 4

Consolidation worksheet to wrap up the learning objectives in the chapter.

Assess learning through an explorative alternative assessment.

Active Maths

Authors: Hawa Shahbal and Penny Sim (Stage 1-3), Sam Kee (Stage 4-6) Level: Primary

Combination of Singapore's teaching approach to Maths with the International Cambridge Primary Maths (0096) Curriculum!

Active Maths is a six-level maths series for learners to build their mathematical knowledge through investigative activities. The unique combination integrates Singapore approach to mathematics with Active Learning strategies to develop strong mathematical foundation skills. Mathematical concepts are scaffolded to suit learners of varied abilities to deepen their mathematical fluency and problem-solving skills. The process of learning involves investigative activities preceding the learning of mathematical concepts. The learners will be highly involved in their learning process and be challenged to think critically and creatively to become effective problem-solvers.

- Uses Problem-based Learning to anchor each chapter with a case problem.
- Each chapter is a learning journey where learners will engage with a problem at the start, and then explore the mathematical concepts through investigations, examples and practices. At the end of the chapter, learners will apply their understanding through reflective application questions.
- Singapore Approach of Concrete-Pictorial-Abstract method enables learners to understand mathematical concepts in a step-by-step, guiding them to achieve mastery in reasoning, problem-solving and conceptual skills.
- Comprehensive teacher's guide to help teachers to deliver high-quality investigative lessons, and provide clear instructions for worked examples.

Active Maths Textbook Stage 4

Each chapter starts with a problem scenario where learners need to gather clues to learn about the problem.

Pictorial representation helps the learners understand the question and understand it visually. This is an important step in the Concrete-Pictoral-Abstract method.

Investigative activities precede learning content, so the learners can explore the mathematical concepts on their own. Learners can apply their prior knowledge and link the knowledge they already know with the upcoming concepts.

Active Maths Workbook Stage 4

Different types of practices to assess newly-learned concepts.

Fun and engaging alternative assessment to assess the learners.

Science SMART

Authors: Jeanette Marchant, Richard Brooksbank, Less Fairclough (Stage 7), Yap Wei Chong (Stage 8), Siew Yee Kit (Stage 9) Level: Secondary

Engaging learners using Active Learning and Enquiry-based Learning!

Science SMART is a three-level science series which taps into learners' curiosity to explore scientific concepts through inquiry-based investigative activities. The series is specially designed to ensure effective scaffolding is present for the learners. The inquiry-based investigative activities have different difficulty levels. The explanation of the scientific concepts is arranged in an easy-to-understand manner using annotated diagrams and graphic organisers for learners to understand the difficult concepts easily. The series aims to help learners to be competent in conceptual understanding and scientific skills.

- Uses BSCS 5E model for Enquiry-based Learning to structure the lessons – Engage, Explore, Explain, Elaborate and Evaluate.
- Each chapter is designed to lead learners into scientific concepts using investigations. Different difficulty levels of investigative activities – structured inquiry, guided inquiry and open inquiry.
- Challenging group discussions and collaborative activities are provided for learners to assess and modify their understanding of scientific concepts. These activities also help to hone learners' 21st century competencies skills.
- Varied levels of questions in the knowledge recall, comprehension of knowledge, application of knowledge learnt and data analysis.

Science SMART Textbook Stage 7

Each unit starts with an unit opener to introduce the overview of the scientific concepts and discussion points to assess the learners' prior knowledge. Learning objectives are provided to let learners know the clear goals for the unit.

Annotated diagram to aid in the explanation of scientific concepts.

Investigation with setup and procedures provided to guide the learners through the investigation and reach a conclusion.

Chapter summary shows the overview of the scientific concepts learnt in the chapter.

Revision questions to consolidate learning objections taught in the chapter.

Applying newly acquired knowledge using Science Connect and Brainstorm features.

978-981-4370-73-8

Maths SMART

Authors: Jackie Sheiber, Jeanette Marchant, Alexandra Braykova (Stage 7), Sam Kee (Stage 8-9) Level: Secondary

Master mathematical concepts through an investigative hands-on activities!

Maths SMART is a three-level maths series designed to help learners build mathematical understanding through investigations of mathematical concepts. In the series, the learners are guided through scaffolding investigative activities before learning the concepts. This allows the learners to explore mathematical concepts and form their understanding through a constructivist approach. The series aims to inspire independent and responsible 21st century competent learners.

- Uses enquiry-based and dialectic approaches to foster literacy and conceptual understanding in mathematics.
- Each chapter starts with engagements features, such as chapter openers and recalling prior knowledge, to trigger the interest of the learners.
- Various active learning activities to explore concepts and hone 21st century skills.
- Successive levels of support are provided for learners through worked examples and inquiry questions.
- Varied types of assessment methods, such as practice questions and application questions.

Maths SMART Textbook Stage 7

Each unit opener iuses real-world examples to trigger discussion and make learning more authentic.

Recall relevant prior knowledge.

Investigation activities to develop knowledge and skills through problem solving, observations and logical thinking.

Step-by-step annotated notes to explain mathematical concepts.

Questions to help learners master the basic concepts.

Alternative assessment method to dispel misconceptions through the reasoning of concepts.

Consolidation of concepts learnt through varied difficulty questions.

Key points of the chapter is summarised to provide learner with quick revision notes.
